## Why join DCCC Board

- I believe that active participation is the best way to “pay forward” the value the DCCC membership have given me over the years. I hope I can take another year in the board and play an active role in

creating events that are both inspirational and excellent networking opportunities for the members of DCCC with a common interest in both Denmark and China. I also like to focus on good governance of DCCC and make sure our members get the most out of their membership payments.

- On a personal note I think the board role provide me with an incredible opportunity to meet influential, intelligent and well-connected people – and I would like to make sure DCCC board will continue our great work so we also can attract great board members going forward and provide our members with an opportunity to meet the active board members and connections the board members may have.

“Whatever DCCC do, we will do it well – so well that when people experience DCCC they will want to come back, and they will want to bring others.

- Lotte Norgreen
